

WEBSwitch

Quick Start Guide

Basic Setup Steps:

- (1) Connect unit to power and network only.
- (2) Set up a computer on the same network to configure WebSwitch™. To do this, set the IP address of the computer to 192.168.1.50 with a netmask of 255.255.255.0.
- (3) Configure WebSwitch™ using web browser. Do this by pointing browser to <http://192.168.1.2/setup.html>. Password is webswitch (all lower case).
- (4) Set the permanent IP address in the configuration page. Restart WebSwitch™ (remove power, re-apply power). After restarting the unit, set your computer back to it's original settings and access WebSwitch™ at its new IP address.
- (5) Connect devices to WebSwitch™ outputs.
DO NOT USE WEBSWITCH TO CONTROL MORE THAN 10 AMPS (APPROX 1200 WATTS) TOTAL.

Factory Default Settings

IP Address: 192.168.1.2
Subnet Mask: 255.255.255.0
Control Web Address: <http://192.168.1.2>
Setup Web Address: <http://192.168.1.2/setup.html>
Username: *no username required*
Control Password: *no password set*
Setup Password: webswitch (all lower case)

Note: As an alternate setup method, you can assign a temporary IP address to WebSwitch™ by using arp and ping commands from a command prompt. See the users manual for details.
