

XW-110 | Quick-Start Guide

1. Connect the module to power (Two AA batteries or 5VDC).
2. On a computer, scan for open Wi-Fi networks & connect to the SSID:
XW110-[Last six digits of Serial Number]
3. If no Wi-Fi network is found called XW110-[Last six digits of Serial Number], remove the front cover and press the 'Access Point' button for 2 seconds.
4. Once connected, open a web browser and enter:
`http://192.168.1.2/setup.html`
5. Enter local Wi-Fi network settings and power cycle the module.
(You can also establish communications using WPS. See users manual.)
6. The module will now attempt to connect to the specified Wi-Fi network.
7. Reconnect computer to Wi-Fi network and access the module through the Wi-Fi network to finish setup.
